SUMMARY

Full Stack Developer skilled in MERN, Next.js, FastAPI, and AI integrations. Experienced in building scalable SaaS products, developer tools, and real-time applications with modern cloud and DevOps workflows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java
Frontend: Next.js, React.js, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs
AI / ML: LangChain, Google Gemini API, Vapi AI, Pinecone, Scikit-learn
Databases & ORM: PostgreSQL, MongoDB, Prisma, Firebase
DevOps & Cloud: Docker, AWS, GCP, Vercel, Git, GitHub Actions, CI/CD

EXPERIENCE

- Google Developer Groups On Campus AOT** Sep 2024 – Present
Full Stack Engineer & DevOps Lead
 - Progressed from Web-Dev Co-Lead (Sep 2024–Aug 2025) to Full Stack Engineer and DevOps Lead (Sep 2025–present)
 - Organized workshops on modern full-stack development with AI and other technologies for GDG campus community.
- Students' Chapter of IET ECE — Academy of Technology** Oct 2025 – Present
Core Technical Member
 - Contribute to departmental tech projects as a core member of the ECE tech team, delivering web solutions with Next.js and TypeScript.
 - Coordinated both technical as well as non-technical workshops and community events for 100+ students.
- BlockseBlock** Jul 2025 – Aug 2025
Software Developer Intern *Remote*
 - Completed a 6-week internship focused on systems-level programming in **Rust**, building and deploying applications on a distributed computing platform (Internet Computer Protocol).
 - Worked on real-world projects involving low-level memory management, concurrency, and performance-critical backend logic; strengthened problem-solving skills in a production environment.

PROJECTS

- JobPair AI** | *Next.js 16, TypeScript, Gemini AI, Vapi AI, PostgreSQL, Prisma, FastAPI* | GitHub | Live
 - Built a production-ready AI career SaaS with four core tools: resume analyzer (scored 0–100 with actionable feedback), interactive career roadmap generator (React Flow), AI cover letter generator with PDF export (jsPDF), and voice-based mock interview powered by Vapi AI + ElevenLabs TTS.
 - Architected a FastAPI microservice in Python (pypdf) to handle PDF text extraction, decoupling it from Next.js Edge Runtime constraints; stored all session history in PostgreSQL via Prisma ORM.
 - Integrated Clerk auth, ImageKit CDN for resume storage, and deployed to Vercel with environment-isolated API routes.
- D2P — Diff to Perfection** | *Next.js 16, TypeScript, Gemini 2.5 Flash, Vertex AI, PostgreSQL, GitHub API* | GitHub | Live
 - Developed an AI-powered GitHub PR code review platform that acts as an automated senior engineer — analyzing diffs for logic flaws, security vulnerabilities, and performance issues using Gemini 2.5 Flash via Vertex AI.
 - Implemented GitHub OAuth (Better Auth), HMAC-SHA256 webhook verification, and a one-click accept/apply workflow that automatically creates a patched branch and opens a new PR via the GitHub REST API.
 - Categorizes up to 10 suggestions per review by type (bug, security, performance, style, refactor) and severity (critical, major, minor) with a full triage dashboard.

ACHIEVEMENTS & COMPETITIONS

- Hackathons & Competitions**
 - Top 30 & Finalist** — Hack4Bengal 4.0 (statewide hackathon, 1000+ participants), Jun 2025
 - Finalist** — Diversion Hackathon & Binary V2 Hackathon, Mar 2026
 - Finalist** — Binary Hackathon at KGECE, Apr 2025
 - 3rd Place** — Decisia at Jadavpur University, 2025
 - 2nd Place** — Gnosis Week at SCCSE-AOT

EDUCATION

- Academy of Technology (MAKAUT)** 2023 – 2027
B.Tech in Electronics & Communication Engineering West Bengal, India
- Heritage Academy High School** 2010 – 2023
Secondary (Class X) & Higher Secondary (Class XII) Kolkata, West Bengal, India
